

## **Faster and Easier Access to Latest Nanotechnology Information through New Graphical View of StatNano Homepage**

2018-09-17

StatNano homepage will be put to display on 24 September 2018. The new graphical view enables visitors to have easier access to science and technology indicators, nanotechnology databases, organizations, news, and publications.

StatNano homepage will be demonstrated with a new graphical view as of 24 September 2018. The new graphical view enables visitors to have easier access to science and technology indicators, nanotechnology databases, organizations, news, and publications. The following sections will be available on the new website:

### **Compass**

Various information about nanotechnology world including trends, new events, and interesting statistics will be presented to the visitors in forms of short facts or hints. Visitors can like or share the topics.

### **Nanotechnology News around the World**

Visitors can read StatNano analytical reports and the latest nanotechnology news from all over the world. Various subjects with hot topics have been collected in this section. Visitors will be directed to the news sources for more information.

### **Nanotechnology Events**

Visitors are able to see and find upcoming nanotechnology events at desired time periods.

If a nanotechnology event is not found on the website, the visitors can inform StatNano website so the event is added to the database.

## **Nanotechnology Industries and Products**

Nanotechnology industrial sectors have been introduced in this section as well as the latest statistics and information about them. Visitors can see information about 5 top nanomaterials, properties, companies, and countries in that industrial sector by just clicking on it.

## **Nanotechnology Standards**

Find standards in your field of activity right now! Statistics and information about nanotechnology standards and national and international standard organizations have been gathered in this section with an insight to the latest standards published by them.

## **Publications**

StatNano analytical reports are available for free in this section in abstract form. Visitors can purchase the full reports on this section.

## **Indicators**

The latest status of your country in nanoscience and nanotechnology has been demonstrated in 17 different indicators in this section in form of graphical charts. Each chart includes the rank and trends of your country in the selected indicator.

## **Nanotechnology Companies**

The new section about companies that introduces top manufacturing nanotechnology

companies all over the world will be very attractive to the visitors. Top companies in each industrial sector have been introduced in this section, and visitors can see more information about the company products by selecting them.

Some main features taken into account in the design and production of the new version of the website are as follows: creation of more appropriate users' experience (UX), ease of scrolling, and faster access to various sections of the website such as indicators, nanotechnology products database, organizations, and events. The new website is more user-friendly, and it is interactive on all platforms such as desktop computers, laptops, tablets, and smart phones.

Please contact us at [info@statnano.com](mailto:info@statnano.com) for your comments and suggestions in order to improve the structure and contents of the new website.
