

C-Bond Systems' Patriot Glass Solutions Division Receives \$30,000 Purchase Order from San Antonio School for Security Film

2022-09-19

C-Bond Systems (CBNT), a nanotechnology solutions company, announced that its Patriot Glass Solutions division has received a purchase order in excess of \$30,000 from a San Antonio high school for security film.

Patriot Glass Solutions' security film product, [C-Bond Secure](#), includes a liquid glass strengthening primer and window film mounting solution used in conjunction with security film to deter forced entry. C-Bond Secure increases the strength of the underlying glass using the Company's patented nanotechnology and, when used in conjunction with security window film, helps to prevent break-ins and other similar crimes.

"This is yet another example of a school in Texas taking the initiative to install our security film to bolster overall student and staff safety," said Michael Wanke, President of Patriot Glass Solutions. "As a Texas company, we have built a name for ourselves amongst schools in our state as a trusted provider of safety and security window film, and we are working with our Patriot Glass dealers in other parts of the country to help them do the same in their communities."

Patriot Glass Solutions also offers C-Bond BRS, a ballistic-resistant film system that includes C-Bond's patented glass strengthening technology and security film to help stop bullets from penetrating glass. C-Bond BRS is validated by an independent third-party laboratory to provide National Institute of Justice (NIJ) Level I, Level IIA, Level II, and Underwriters Laboratories (UL) 752 ballistic-resistant protection.
