

Xiaomi Launches a New Graphene Baseboard Heater

2022-11-09

Xiaomi announced a new product, the Mijia Graphene Baseboard Heater (Fire Edition). The device uses two graphene-based heating elements, and has a simulated flame function that uses an integrated humidifier and LEDs to generate the flame appearance.

The Mijia Graphene Baseboard Heater is available now in [China](#) for pre-order for 1,299 yuan (around \$180), and its retail price is expected to be 1,599 yuan (around \$220).

As with many others graphene based heating devices on the market, Xiaomi says that the graphene heating elements provide uniform, efficient, quick and healthy heating.

These aren't Xiaomi's first graphene heating devices, back in 2020 it launched graphene smart heating mattresses.
